

The innovative Tele-Mount is the ultimate utility tool for Anchor Drive attachments. Not only does it have industry first features like boom rollers, two connection points, and integrated transport stabilizers it provides excellent operator visibility. Safety and productivity are maximized!

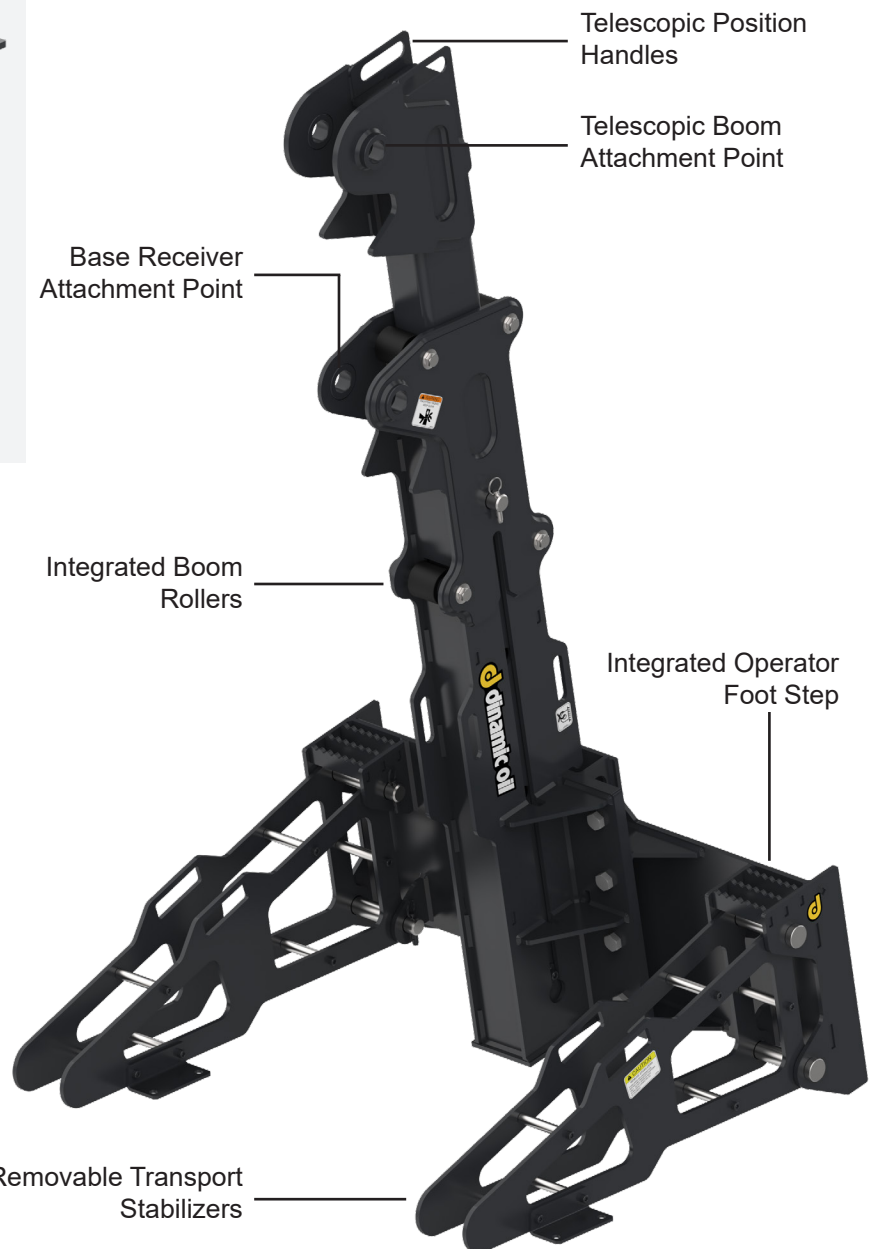

The Tele-Mount is designed to be adaptable and can be used in three different configurations on two different prime movers making this the most modular SSL mount available in the helical pile installation industry.

1 Mounting Platform

2 Different Prime Movers

3 Configurations

Tele-Mount Features:

- Up to 14 feet of pin height when used on large skid steer loaders.
- 16,000 ft-lbs torque capacity rating.
- Removable stabilizers are included – *no need to pay extra for a storage frame.*
- Removable stabilizers provide safe and simple transport.
- Built-in rollers allow the telescopic boom to slide easily inside the receiver.
- Telescopic boom can be pinned at various lengths to make installation heights manageable.
- Full articulation allows for accurate installation angles.
- Safety stop prevents the boom from accidental separation.
- Excavator ear kits install easily and quickly with universal bolt plate.
