

CONSTRUCTION ATTACHMENTS

Dinamic Oil's newest product offering utilizes our core product - planetary gearboxes in highly engineered anchor drive attachments. Applying over 40 years of gear design, we're supporting this rapidly growing industry with our innovative line of anchor drives, mounting kits and patent-pending torque management system.

HEAVY-DUTY WORK ETHIC

The Construction Attachments portfolio includes Anchor Drives developed specifically for the demanding helical pile industry. Our Torque Management offering consists of the industry's most advanced torque management system, a differential system that will work with any Anchor Drive or choose the standard pressure differential kit. We also offer mounting kits to outfit most prime movers. Our modular design approach and industry-first features provide cost-effective and flexible mounting platforms that simplify adapting to your machine.

SA Series

Our single-speed SA series is compact yet robust, utilizing hydraulic orbit motors coupled to our highly-efficient planetary gearboxes. SA series is available in a range from 3,200 ft-lbs to 30,000 ft-lbs of torque.

TA Series

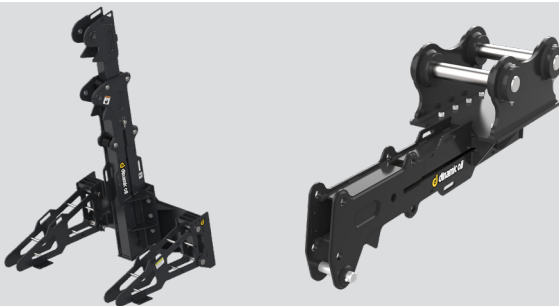

Our two-speed TA series utilize piston motors coupled to multistage planetary gearboxes. The TA series is available in a range from 16,000 ft-lbs to 300,000 ft-lbs. The standard automatic shifting feature is ideal for helical pile installation providing maximum productivity.

Torque Mgmt

Our Torque Management systems are developed specifically for the helical pile installation industry and have features you won't find anywhere else. We offer three different solutions, each with features and benefits to suit large-scale infrastructure projects to residential foundation improvement jobs. Our comprehensive product offerings ensure you always have the right tool for the job.

Mounting Kits

All mounting kits and components complement our Anchor Drive product line to ensure proper fit and accurate positioning during use. We offer the most common types of mounting kits Walk-Behind Skid Steer, Skid Steer Loader, and Excavator. Custom mounting kits are available upon request for specific machines such as Tele-Handlers, Utility Trucks, and Cranes.

All Prime Movers

We've developed mounting kits for all types of Prime Movers. Contact us to learn more about our custom mounting solutions.

For more than 50 years Dinamic Oil has been developing innovative gear products that stand apart from the competition to meet the needs of our diverse customers.
